Activity

I prepared a report on two differently able children.

A girl named Gayatri who is born with blindness, of one of her eyes she lived in Dasannapeta. she is studying 6th class in Govt. high school.

Disability :-

she is studying in a normal school where she can read the lessons with the help of the friends. If she reads for a longer period, she gets eye pain. Now a days her sciened eye vision is also going down due to which classes.

Assistance from the government :-

our state government helps her in many ways.

5

she is in the list of physically handicapped. she has the certificate of it. she gets scholarship from her caste, notification. Her mother keeps her a lot and takes care of her.

Her family :-

Gayatri father's name is Satya Rao.

Her mother name is Veni. Father is a coasherman and her mother is housewife. They cannot afford for Gayatri's education so, she studies on her own listening to her teachers teaching.

Her goal :-

Gayatri's goal or aim is to become teacher to the blind children. She says after growing old, she plan to learn while helps to educate

the blind children, she also want to help her family by her support.

Her education :- she is studying 6th class In a normal school. she is a poor girl.

→ A boy named Gopi is a deaf student and dumb. He is studying 9th class. He takes the help of his friends or father.

Disability :-

He can't speak fluently as other speak because he could not hear and grasp the words properly. Whenever is a time he gets practices to pronounce help of his sister. He try her level best. He do hardwork. He tried a lot to learn English & pronunciation.

1
7
His family :-

Gopi's father is cloth merchant and his mother is a school teacher.

Gopi has one sister. He studies very well. He is smart in all the ways. He takes help of his sister in money thing can't do.

His goal :-

Gopi wants to keep his family happy. he wants to attain a good position in future. He wants to help the people with different disabilities. He wants to do good earning and be support to his family. He wants to be kind and help his friends and other neighbors.

-Activity - a

ii. observation of 5 classroom teaching periods in each of special schools and inclusive schools and prepare a report highlighting the teaching strategies.

i. I observed one classroom in Sun school. The faculty is teaching multiplication using lattice method. Students can understand easily multiplying 3 digit numbers with digits or 4.

		3	7	0	2	0	
1	0	3	0	7	0	2	3702 x 1234
2	0	6	1	4	1	4	
3	0	9	2	1	0	6	
4	1	2	2	4	0	8	

add numbers diagonally

ones place = 8

tens place = $8 + 0 + 6 = 14$

hundred place = $2 + 2 + 1 + 0 + 4 + 1 = 10$

9

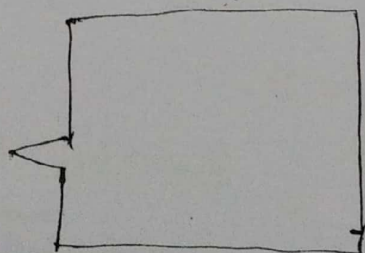

$$\text{Thousands place} = 1 + 9 + 2 + 4 + 3 = 19$$

$$\text{Ten thousand place} = 0 + 6 + 1 + 7 + 1 = 15$$

$$\text{Lakhs place} = 0 + 3 + 1 = 4$$

12. I observed another teachers class in San school in mathematics subject the students often target to remember area and perimeter formula then they may not know a irregular shape.

The students were given square piece then the teachers asked them to measure the perimetre then the teachers asked them to measure the perimeter of irregular shape.

Then students keep the irregular shape of the floors. Then they place the pieces and consider it as one block then they calculated the perimeter of the irregular shape.

→ I observed another class in Narayana school that students of 6th class were asked to write a paragraph or hints, development normally students write in a non sequential to day. To write it in a proper this followed some rules. They follow the first one is students are asked to think of the characters, then setting of the story. After - words they need to think of a problem in the given hint and they

need to think of a problem in the given hint and should think of the ending story.

Generally students think of Rhyming words only. where as they students were asked to think of some language teachings like simple metaphors, personification, sensory details and teachers told a new monic (SSMAP) then the students were excited to do it.

Example :- 18×7

First multiply the unit digit numbers $18 \times 7 = 56$.

Then make the single digit numbers as it tens value.

So 7 becomes 70

12

then we have to added the two

$$18 \times 7 = 56 + 70 = 126$$

Activity - 3

3. From a small group of 5-6 students teacher and conduct an awareness campaign any village / ward on causes preparation and refered series.
- prepare a report :-

I Asis patel along with my friends lakshmi, seetha, shankar and ramiya had conducted an awareness programme on polluting the environment through improper usage of washroom and the necessity of toilets in the area. there is a village with details place. seethampeta

population - 500 houses,
1200 population

First, we announced the villages

attended the meeting that we are conducting on a particular date. Then people gathered there at the right time we gave.

Initially we asked the president of the village to speak then we started to explain.

Regarding the cleanliness :-

we informed them that the human waste on the road side and the given leads to the ill health.

Due to which people may be affected to the ~~diseases~~ like cholera, dengue, malaria, etc by the mosquito breeds these.

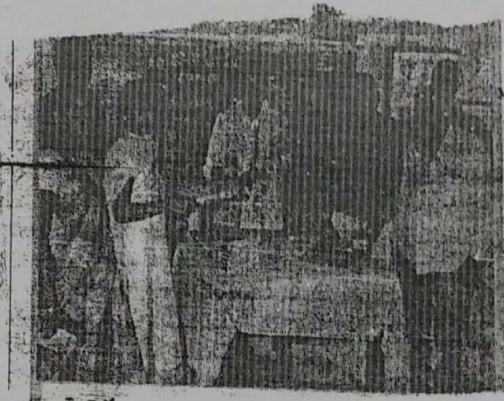

we also explained that more than 20 people suffered

15.
from fever and various types of
vomiting because of this during
the rainy season as per the records
of ANM's report in that area.

one of my friends explained
the health problems of the disabled
people like blind, deaf and physically
handicapped. they are already having
a problem in them addition of this
fever and other type of disease
may lead to severity of their
inability.

we all one of my other friend
in sisted to build toilets around the
area each house must have a toilets
of its own. which could avoid the
diseases to spread where we can

reduce mosquitoes to breed so,
everyone must have take it
seriously to prevent the diseases
around as all the final stage
of the meeting we concluded it
by taking from the villages that
they will take staff precautions
to keep themselves neat and to
keep their surroundings neat and
tidy.

-Activity -4

-Activity-

N I -Asis patxo visited saibind school in pedbhagh, vizianagaram the organization provides the students various referral services, medical aids, skills, training, counselling, income resources mobilization and the machines related to hearing and reading materials.

Improving skills in related to and reading materials

Improvisation of skills :-

Here the children are very active and differently these people are lucky to win through vocal competition, drawing competition etc. This institute also provide away for up grading of skills, talents and improvisation of their personal behaviour

General awareness :-

They also provide the awareness about external socio economic institution manage skills, Technical skills and organizational skills.

Organizing out standing competition :-

The management helps the students by organizing competition to all level in all ground development of external, internal and staff, national level too.

Development of soft skills :-

This institute not only helps the students in providing general awareness but also concentrates in development of soft skills.

they help the student in various ways like recruitment of jobs through job means by approaching welfare society.

This is the photograph of the students who participated in music competition a student, named Ramesh stood first in the music competition. He is well known through the word as a singer.

In this way the organisation with its supporters are guided the students to attain their goals in a wonderful manner.

the famous persons in the city
 are also joining their hands as a
 support to the organization are
 treating the students as their own
 children and are satisfying all
 their needs.

Activity - 5

Activity 5

critically analyse the needs, strengths and issues differently abled children mentally, visually and hearing challenge.

Characteristics of mentally challenged children :-

- they can be identified by the way how they conduct themselves at home and in school.
- they have poor comprehension capacity.
- they have poor reasoning.
- they cannot solve social problems.

Learning disabilities :-

- processing disability
- specific learning disability
- perception disabilities
- sequencing disabilities

- > abstraction disabilities
- > language disabilities
- > motor disabilities

Hearing impairment :-

Identification of hearing loss in infant and children require careful observation through medical examination with an extensive case history and an audio logical education to be more comfortable for them. Early warning signs of hearing loss.

→ they can hear but can't understand

→ they ask for repetition

→ they need the TV more loudly

→ they have difficulty in understanding

studying people when they place.

Visual challenges :-

Students with visual impairment may look like typical children but early signs can indicate a problem. It's important to identify these signs at a young age in order to take advantage of early intervention.

characteristics of hearing impaired :-

- Ignores directions and confuses with direction
- confuses in following direction
- sub normal report in vocal communication and games
- Exhibit speech defects.
- They are generally lazy
- They addit today - dreaming
- They got confused with social setting

- they are markedly reactive with praise and affection
- they exhibits symptoms of lip reading
- they get insulted frequently
- they are impulsive & explosive

Education to the hearing impaired :-

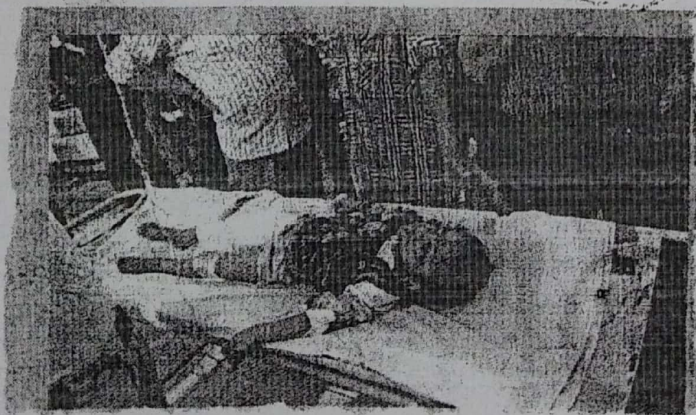

- Identification and proper treatment should be the first step in the education process
- proper use of hearing aids is to be encouraged
- Training must be provided in lip reading skills
- specialized curriculum is to be implemented

Education to mentally changed children :-

The learning should be facilitated...
by for hand experiences, expectation
or learning by doing more than verbal
or abstract learning.
They must be given teaching in
unskilled jobs -

→ They must be trained in oral
communication skills

→ They may be encouraged to
solve puzzles or riddles
